PROFILE

Full-stack developer skilled in JavaScript, **Node.js**, React, **Next.js**, and MongoDB, with experience in building scalable web applications, optimizing databases, and delivering responsive, user-friendly interfaces. Adaptable, detail-oriented, and passionate about problem-solving and continuous learning.

EDUCATION

Islamic Azad University of khorasgan

Bachelor of Science in Computer Software Engineering

Kharazmi university

Associate's Degree in Computer Science

PROJECTS

Portfolio

- Developed a 3D interactive portfolio website using **Three.js** and WebGL, increasing average session duration by 25% through an immersive user experience.
- Implemented smooth animations, advanced lighting, and dynamic camera controls, significantly improving visual appeal and interactivity.
- Optimized performance for all major web browsers, reducing load times by 40% and ensuring responsive design across devices.

Talawin

- Designed and developed a secure online gold trading platform with real-time updates using **Socket.io**, ensuring instant data synchronization between users and the server.
- Implemented a modern and responsive frontend using React.js and **Next.js**, enhancing usability and accessibility across devices.
- Built a robust backend with **Node.js**, ensuring high performance, secure transactions, and scalable architecture to handle increasing user demand.

FriendlyCm

- Created a Discord bot integrated with an online **Google API**, **Battle.net Api**, enabling real-time data retrieval and automated responses for community members.
- Developed advanced features for token price tracking and group management using JavaScript, improving moderation efficiency and reducing manual tasks by 40%.

CheeMarket

- Developed a comprehensive suite of applications for an online food shop, streamlining operations from ordering to delivery.
- Created a mobile app for customers using Java and Android Studio, improving order placement speed and user convenience.
- Developed an admin dashboard for PC using C#, enabling efficient order tracking and inventory management.
- Built a delivery management app for Android and a warehouse management app in C#, reducing delivery delays by 25%.
- Designed and developed the website using **React.js** and **Next.js** with a PHP Laravel backend, ensuring a responsive UI and smooth backend integration.

SKILLS

Languages

- JavaScript – Professional
- TypeScript – Intermediate
- PHP – Advanced
- C++ – Intermediate

Databases / Tech Stack

- MySQL – Advanced
- MongoDB – Professional
- Docker – Intermediate

Libraries & Tools

- Three.js (3D website development) – Intermediate
- Passport.js – Advanced
- JWT – Professional
- Redux – Professional
- Socket.io – Professional
- TailwindCSS – Professional
- Google APIs – Advanced
- Mediasoup-Intermediate

Frameworks

- Next.js – Professional
- Express.js – Professional
- Laravel – Advanced
